AI & Machine Learning | AR/VR Development | Full-Stack Engineering

TECHNICAL SKILLS

AI & Machine Learning: TensorFlow, PyTorch, Hugging Face Transformers, OpenAI API, NLP, AWS (EC2), RL, MCTS

Programming Languages: Python, Java, Kotlin, TypeScript, C++, C, SQL, JavaScript, Swift, Assembly

Full-Stack & Web Development: Flask, Firebase, Node.js, React, HTML, CSS, GitHub, WordPress

AR/VR & Human-Computer Interaction: Unity, AR Foundation, XR Interaction Toolkit, Meta Aria SDK, Blender, Meta Quest

Tools & Platforms: Visual Studio Code, Android Studio, Unity Editor, Xcode, Power BI, Canva, Microsoft 360

Languages: English (Native), Spanish (Professional Proficiency)

PROFESSIONAL EXPERIENCE

BART AND ASSOCIATES, INC.

2024 - 2025

IT Intern

Washington, DC

- Researched and evaluated AI recruitment tools; created ATS integration guides; collaborated with leadership to align recommendations with hiring goals.
- Modernized 5+ year WordPress platform, patched security vulnerabilities, and improved stability and performance.
- Proposed AI-driven payroll workflow automation, streamlining approvals and improving employee data systems.

GEORGE WASHINGTON UNIVERSITY

2023 - 2025

Student Academic Assistant

Washington, DC

- **AR/VR (20+ students):** Mentored students through the full lifecycle of educational game development, teaching Unity, AR Foundation, immersive design, and asset creation for Meta Quest platforms.
- **Software Engineering (12+ students):** Taught core concepts (Java, C, REST APIs) and guided the development of full-stack, multithreaded applications with scalable client-server models.
- **Database Systems (6+ teams):** Led teams of 3 in building database-driven applications, teaching SQL, ER modeling, and full-stack development with Flask, Firebase, and AWS EC2.

THADDEUS RESOURCE CENTER

2024 - 2025

Web Development Intern

San Dimas, CA

- Led UX Improvements and developed new features on the community-facing react web platform.
- Managed Agile workflows, such as sprint planning and task coordination, to deliver bi-weekly updates and bug fixes.

TRICORP

2022 - 2025

IT and Web Development

Charleston, SC

- Built and deployed the company website using React, hosted on Github Pages with custom domain configuration.
- Led end-to-end development: UI/UX design, responsive front-end implementation, and mobile optimization.

PROJECTS

GESTURE: Sign Language Translation System (Winner, 2025 Derril C. Rohlf's Award)

- Led UI/UX design and Meta Aria Glasses integration for a real-time sign language translation app (team of 5).
- Built an Android app (Jetpack Compose) with real-time gesture capture, video streaming, and an NLP translation pipeline.
- Integrated a Transformer NLP model and deployed the full-stack system with Flask APIs and Firebase.

DominateAI: AI-Powered Risk Game Strategy Engine

- Built turn-based strategy engine using expectiminimax, Monte Carlo Tree Search, and reinforcement learning algorithms.
- Designed dynamic heuristic evaluation functions for territory control, threat modeling, and resource deployment

Dino Drive VR (Winner, 2024 Festival of Animation Award)

- Developed a VR educational game in Unity for Meta Quest using physics-based interactions, and real-time event systems.
- Designed 3D assets, procedural animations, game mechanics, and narrative systems to improve user engagement.

Automated Academic Advising & Registration System

- Developed a full-stack system with automated advisor assignments and graduation tracking.
- Built advising module using Python, JavaScript, CSS, Flask, and Firebase Realtime Database; deployed via AWS EC2.

EDUCATION

George Washington University - School of Engineering & Applied Science

Bachelor of Science in Computer Science, Honors Program

Washington, DC
