TECHNICAL SKILLS

AI & Machine Learning: PyTorch, TensorFlow, Hugging Face Transformers, OpenAI API, NLP, MCTS, LLM Integration

Programming Languages: Python, Java, JavaScript, TypeScript, Kotlin, C++, SQL, C

Full-Stack & Backend Development: React, Node.js, Flask, Firebase, REST APIs, PostgreSQL, MySQL

Cloud & Engineering Tools: AWS (EC2), Git, GitHub, Android Studio, VS Code, Xcode, Unity

PROJECTS

GESTURE: Sign Language Translation System (Winner, 2025 Derril C. Rohlf's Award)

- Led UI/UX design and Meta Aria Glasses integration for a real-time sign language to speech translation app.
- Built an Android app with real-time gesture capture, video streaming, and an NLP translation pipeline.
- Integrated a Transformer NLP model and deployed the full-stack system with Flask APIs and Firebase.

Automated Academic Advising & Registration System

- Developed a full-stack system for automated advisor assignment and graduation tracking, supporting multiple user roles.
- Engineered the advising module to perform real-time degree audits, automatically clearing students for graduation.
- Built using Python/Flask and JavaScript/CSS, utilizing Firebase for data, and deploying the scalable solution via AWS EC2.

Dino Drive VR (Winner, 2024 Festival of Animation Award)

- Developed a VR game in Unity for Meta Quest using physics-based interactions, and real-time event systems.
- Designed core mechanics and interactive environments to create an engaging, immersive Jurassic user experience

PROFESSIONAL EXPERIENCE

BART AND ASSOCIATES, INC.

Sep 2024 - Jun 2026

Software Engineer

Washington, DC

- Integrated AI strategies into the ATS, streamlining the hiring pipeline and increasing recruiting productivity by 20%.
- Developed and maintained the core 5+ year old WordPress platform by patching security vulnerabilities, optimizing performance, and creating multiple landing pages/websites for BNA joint ventures.
- Engineered an automated web-scraping pipeline to retain BNA contracts worth over \$100K each, using SharePoint, Jira, Google Gemini, and Power Automate in an Atlassian environment.

BRAINS AND MOTION EDUCATION

Aug 2025 - Jun 2026

Afterschool Stem Instructor

San Francisco, CA

- Organized daily educational programs for 20+ third-grade students in a bilingual environment, delivering hands-on STEM, Arts, and Sports (STEAM) curriculum tailored to a diverse Latine community.
- Structured dedicated academic mentoring blocks to guide students through homework completion, improving baseline understanding of core subjects while managing active "brain breaks" and recreational recess activities.
- Leveraged professional Spanish proficiency to facilitate cross-cultural learning, ensuring inclusive communication with students, parents, and school staff.

GEORGE WASHINGTON UNIVERSITY

Jan 2023 - May 2025

Student Academic Assistant

Washington, DC

- Mentored 20+ AR/VR students through the full lifecycle of educational game development, teaching Unity, AR Foundation, immersive design, and asset creation for Meta Quest platforms.
- Instructed 12+ software engineering students in core concepts (Java, C, REST APIs) and guided the development of full-stack, multithreaded applications with scalable client-server models, emphasizing collaborative product development.
- Led 6+ teams in building database-driven applications, teaching SQL, ER modeling, and full-stack development with Flask, Firebase, and AWS EC2 to create robust solutions.

TRICORP

Jun 2022 - Jun 2025

IT and Web Developer Lead

Charleston, SC

- Architected and deployed the company website using React and JavaScript, hosted on GitHub Pages with custom domain configuration, enhancing online presence and accessibility.
- Directed end-to-end development initiatives including UI/UX design, responsive front-end implementation, and mobile optimization, utilizing full-stack skills to improve overall user engagement and satisfaction.

EDUCATION AND CERTIFICATIONS

George Washington University - School of Engineering & Applied Science

Graduated: May 2025

Bachelor of Science, Computer Science

Washington, DC

- **Achievements:** Honors Program

Codepath Alumn
