SUMMARY

AI-driven developer experienced in building intelligent systems across vision, NLP, and immersive tech. Skilled in crafting ML pipelines, deploying Transformer models, and building real-time AR/VR apps via Unity and Android. Adept at turning complex challenges into impactful, user-centered solutions. Passionate about using AI to drive accessibility, automation, and next-gen interaction across industries.

PROFESSIONAL EXPERIENCE

BART AND ASSOCIATES, INC.

2024 - 2025

IT Intern (September 2024 – Current)

Washington, DC

- Designed layout and drafted content for the 2024 end-of-year newsletter, ensuring consistent messaging and visual appeal.
- Advised leadership on AI integration strategies to streamline HR and payroll workflows, including automation and data insights.
- Collaborated with the IT team to keep the website updated, improve hosting, and enhance security.

GEORGE WASHINGTON UNIVERSITY

2023 - 2025

Student Academic Assistant (August 2024 – May 2025)

Washington, DC

- Taught and lectured Software Engineering, Databases, AR/VR, and Advanced Topics in Augmented Reality to over 50 students.
- Oversaw student groups, guiding project management and ensuring successful outcomes.
- Collaborated closely with faculty to enhance course curriculum and increase student engagement.

TRICORP

2022 - 2025

IT and Web Development (June 2022 – Current)

Charleston, SC

- Developed and launched a new website, resulting in 50% increased online visits and user engagement.
- Maintained and updated website performance to optimize user experience.
- Oversaw several infrastructure improvement projects, enhancing the company's IT and web development capabilities.

THADDEUS RESOURCE CENTER

2024 - 2025

Web Development Intern (May 2024 - January 2025)

San Dimas, CA

- Contributed to front-end development using React, Node.js, and JavaScript, enhancing UI and performance.
- Integrated modern web technologies and optimized code for improved functionality
- Participated in Agile sprints and weekly team meetings, using Sprint boards to track progress and ensure timely project delivery.

PROJECTS

Application Registration and Advising System (ARGS)

- Led a collaborative effort to develop a full-stack system for automated advising and registration.
- Developed the advising module, streamlining advisor assignments and graduation processes.
- Utilized Python, JavaScript, and CSS to create an efficient and polished system.

Dino Drive

- Developed DinoDrive, a Virtual Reality experience using Unity, which won the 2024 Festival of Animation award.
- Created an educational Jurassic platform, integrating advanced Virtual Reality technologies for an immersive experience.
- Designed detailed graphics and interactive elements to enhance user engagement.

Artificial Intelligence Strategy Engine for Risk: Global Domination

- Built a strategic AI using expectiminimax to model outcomes and optimize territory control decisions.
- Applied Monte Carlo simulations and reinforcement learning to adapt troop placements via gameplay.
- Created a heuristic evaluation function factoring map control, threats, and opponent behaviors.

GESTURE: A Sign Language Translation System

- Built a vision model using deep learning to classify DGS gestures from Meta Aria Glasses video input.
- Implemented a Transformer-based NLP model for gloss-to-English translation with sequence-to-sequence learning.
- Combined computer vision, deep learning, and UI/UX design to enable real-time, accessible communication support.

EDUCATION

GEORGE WASHINGTON UNIVERSITY, School of Engineering and Applied Science – GPA 3.35

May 2025

Bachelor of Science , Computer Science

Washington, DC

Honors & Awards: Presidential Award, Dirk S Brady Endowed Scholar, Derril C. Rohlfs Senior Design Award

Tau Kappa Epsilon: Lead community service and philanthropy efforts supporting St. Jude's and oversee risk management initiatives.

Theta Tau: Increased chapter size by 40% and awarded for recruitment and leadership excellence.

Select Coursework: Software for Handheld Devices, Augmented & Virtual Reality , Databases, Artificial Intelligence Algorithms

SKILLS

Programming Languages: Java, Python, C, Assembly, CSS, Javascript, SQL, Kotlin, HTML, Unity, XML, C++, WebGL, React, Node.js

Software Applications: Microsoft 360, Unity, Gamemaker, Wordpress, Canva, Android Studio, Visual Studio Code, Github

Languages: Spanish (fluent), English (fluent)
